Elift

Lifting Magnet

The unmistakable advantages of the lifting magnets Elift from Assfalg are economy and fast handling.

The hand-operated permanent lifting magnet is the perfect and fully developed solution for moving all ferromagnetic materials in an efficient, safe and reliable way.

- Vertical transport
 $F_v = 1/3 F_h$

- The safety lock prevents accidental loosening under load

Application

- ▶ For flat and round material, because of v-prism pole shoe
- ▶ Select lifter size according to load and for easy operation of the switching level
- ▶ For raw material, semi-finished and finished products
- ▶ In mechanical engineering, tool manufacturing, plant engineering, steel construction, ship-building, transport company or materials store

- 👉 The “strongest” magnet can lift 5 t of flat material

Professional advantages

- ▶ Absolutely safe lifting - with 3-times safety factor (the pull-off strength is 3 times more as the recommended lifting force)
- ▶ No restrictions on scaled, rough or oily surfaces
- ▶ No damaging of the work piece surface
- ▶ Smooth switching ON/OFF via hand lever
- ▶ Optimization of crane capacity and space because of independent permanent magnet lifter
- ▶ Smooth lever more when switching OFF provided correct lifter size was selected

Features

- 👉 Two-hand operation via hand lever and safety lock
- 👉 Max. operation temperature 80°C
- 👉 Use of durable and extremely strong neodymium magnet materials
- 👉 Compact, sturdy construction, low dead weight

Options

- 👉 Additional crane eye for lifting and vertical transport (load only 1/3, available for Elift 300/Elift 500 (Art. No.47392)
- 👉 Special version for hot temperature use
- 👉 Special version for immersing into profiles or for larger diameters
- 👉 Service and repair according the safety rules

Mlay

Permanent lifting magnets

The manually operated permanent lifting magnets with swiveling single or double hooks are ideal for horizontal and vertical transport of materials.

MLAY 600

MLAY 1000x12

Application

- ▶ For thin and thick sheets depending on magnet size
- ▶ For use on the crane
- ▶ In mechanical engineering, tool manufacturing, plant engineering, steel construction, ship-building, transport company or materials store

MLAY 1000x3

Professional-advantages

- ▶ Absolutely safe lifting – with 3-times safety factor (the pull-off strength is 3 times of the recommended lifting force)
- ▶ The safety lock prevents accidental release under load
- ▶ Smooth switching ON/OFF via hand lever
- ▶ Swiveling single or double hook depending on magnet size

Features

- ✔ Double hook stabilizes the load and reduces dangerous vibrations
- ✔ Single hook for vertical transport
- ✔ Exchangeable pole shoes

HL | SH 12 | HL 60-CE | HL 60-CEL

Permanent Magnet Handlifter

The permanent magnet handlifters SH (from German production) and HL are suitable for transporting especially thin sheets as well as oily or sharp edged ones.

The permanent magnet handlifter HL 60-CE is especially designed for hot or sharp edged flamecut parts. It gets magnetized or demagnetized over push buttons on the handle. The HL 60-CE accu lasts for 1000 switching cycles before recharging. The charger and an exchange accu are included.

The **HL 60-CEL** is with long handle.

SH 12

HL 60-CE

HL 60-CEL

Application

- ▶ Handling of thin sheets or small flamecut parts
- ▶ Max. operation temperature 80°C
- ▶ For HL / SH the workpiece surface should be clean and dustfree (oil does not effect the magnetic force)
- ▶ Usable in mechanical engineering, tool manufacturing, plant engineering, steel construction, shipbuilding, still mill, transport company or materials store

Features HL | SH 12

- ⚙ Horizontal or vertical sheet transport
- ⚙ Destacking of even 2 mm sheet thickness
- ⚙ Very flat magnetic field, especially designed for thin sheets
- ⚙ Mechanical release by pushing the handle

Delivery contents HL 60-CE | HL 60-CEL

- ⚙ HL 60-CE | HL 60-CEL
- ⚙ Charger 230V with 2 x accu 12V

Features HL 60-CE | HL 60-CEL

- ⚙ Fast handling of sharp-edged or hot metal parts
- ⚙ Magnetizing or demagnetizing by push buttons
- ⚙ Nearly no residual magnetism, therefore insensitive to dust or chips
- ⚙ The electrical switching protects the workpiece surface
- ⚙ Long lasting exchange accu, up to 1000 ON/OFF cycles

Technical data

	Hold surface	Lifting force	Drag force	Sheet thickness	Weight	No.

HL 60-CEL	56 x 42	27	-	> 5,0	2,5	69924

SH 35-K | SH 60-K

Crane Magnet Transporter

Since decades crane transporters of the SH series have been considered to be a economic solution for horizontal or vertical transport by crane. Contrary to other permanent magnet lifters the SH types have a flatter magnetic field especially designed for picking up sheets with 3 mm thickness and more. They are a real alternative to mechanical transport clamps, even for support during sheet bending process.

Vertical transport
Fv = 1/3 Fh

SH 35-K

SH 60-K

Application

- ▶ Suitable for sheets with thickness from 3 mm
- ▶ Use on clean sheets (oil does not negatively effect magnetism)
- ▶ Sheet or plate can be tilted
- ▶ Usable in mechanical engineering, tool manufacturing, plant engineering, steel construction, shipbuilding, steel mill, transport company or materials store

Features

- ⚙ Mechanical release by handle
- ⚙ Max. operation temperature 80°C

Options

- ⚙ Rope loop for a soft mounting on the crane hook
- ⚙ Service and repair according to safety regulations

Technical data

	Hold surface	Lifting force SWL 3:1	Drag force SWL 3:1	Sheet thickness	Weight	No,

SH 60-K	310 x 190	500	167	ab 6,0	12	106

SB200 | SB500 | SB950

Battery Lifting Magnet

The electropermanent battery lifting magnets are suitable for the flat material load range of 200kg | 500kg | 950kg and the round material load range of 50kg | 200kg | 400kg. Using a current pulse of less than one second the electropermanent battery lifters SB200 | SB500 | SB950 from Assfalg are switched manually by pushbuttons or automatically. Although no current flows during the transport of the load, the workpiece remains safely clamped like a permanent magnet. Up to 1000 ON/OFF switching cycles by SB200 | SB500 and 500 ON/OFF switching cycles by SB950 are possible before recharging the integrated accu by the supplied mains charger.

SB200

Application

- ▶ For flat and round material
- ▶ Destacking from 4mm sheet thickness by power reduction
- ▶ Independent from mains supply
- ▶ In mechanical engineering, tool manufacturing, plant engineering, steel construction, shipbuilding, steel mill, flame cutting, transport company or materials stores

SB950

SB500

SB500

SB200

SB200 with special pole shoes

Professional advantages

- ▶ No battery flow during lifting (only a current pulse for a few seconds is required for magnetizing or demagnetizing)
- ▶ Replaceable and rechargeable battery box for SB500 and SB950 mounted externally
- ▶ The magnets are either manually switched via push buttons or automatically via AUTO function
- ▶ Power reduction for destacking or low weight loads
- ▶ A built in security mechanism prevents switching when the load is suspended
- ▶ Option: Positioning drawbar SB 950, swivel-mounted in Z-Axis +/- 60°

Features

- ✔ Auto mode is instead of wireless control
- ✔ Up to 1000 ON/OFF switching cycles before recharging
- ✔ Accu (lithium-ion battery) is charged in approx. 2h mains charger 110V / 230V / 50-60Hz

SB950-SF

Battery Lifting Magnet

The electropermanent battery lifting magnet is suitable for the flat material load range of 950kg and the round material load range of 400kg. It has an installed sensor. It measures the magnetic force, compares it with the workpiece weight and shows on the display if the workpiece can be transported. Parameters such as surface property, material thickness and material are considered here.

The automatic mode allows for contactless switching. A switch process is generated each time the magnets are added and the crane eye let relieved and the magnet switches on or off. It is no longer necessary to bend or climb machine tables. Together with the optionally available positioning drawbar, workpieces can be picked up, guided and placed down accurately.

Professional advantages

- ▶ Visual load display
- ▶ No current flows during lifting (only an electrical impulse for a few seconds is required for magnetizing or demagnetizing)
- ▶ The magnets can be switched manually through a push button or automatically through a pick-up mechanism
- ▶ 3 power levels to lift materials with a thickness starting at 4 mm
- ▶ Externally mounted replaceable and rechargeable battery box

Features

- ⚡ Optical and acoustic warnings for battery charge state
- ⚡ Up to 1000 ON/OFF switching cycles before recharging
- ⚡ Accu (lithium-ion battery) is charged in approx. 2h mains charger 110V / 230V / 50-60Hz

Technical data

	Dimensions	Load	Min.	Max. load	● Load	∅	Hold surface	Weight	No.
	[L×W×H] [mm]	SWL 3:1 Fh [kg]	thickness [mm]	capacity from [mm]	SWL 3:1 Fh [kg]	from - to [mm]	[mm]	[kg]	
SB950-SF	355 x 165 x 195	950	4	20	400	75 - 200	320 x 130	46	68115

Positioning drawbar

For Lifting Magnets

Positioning drawbar for guiding and positioning the SB, EPMB and EPMM lifting magnets. The positioning drawbar has a gradual flexible range of +/- 60°.

The adjustment occurs easily by loosening the hand brake.

A wireless remote control can be installed directly on the handle to switch the magnets on and off. Other remote controls to control cranes are possible on request.

Professional advantages

- ▶ Workpieces can be precisely picked up, guided and set down
- ▶ Optional: radio remote control for switching the magnet

Features

- Ⓛ Made of stainless steel
- Ⓛ Infinitely variable swivel range adjustable +/- 60
- Ⓛ Mounted with 4 screws, can be removed at any time

Technical data

	Dimensions [L]	Weight	No.
	[mm]	[kg]	
Positioning drawbar	1300	9,5	70129

EPMB

Battery Lifting Magnet

The electropermanent battery lifting magnets can be used without connection to the power supply. They combine safety of permanent magnets with the operation comfort of electromagnets. Sheets from 6 mm thickness can also be separately lifted from stack. Even magnetizing and demagnetizing of the lifting magnet can take place automatically.

-  The automode mechanism: The magnet switches automatically, as soon as it is put on the workpiece and the crane hook is released!

Application

- ▶ For flat and round material because v-prism pole shoe
- ▶ Operation is independent from mains supply
- ▶ Usable even for beam operation with 2 magnets
- ▶ For raw material, semi-finished and finished products
- ▶ In mechanical engineering, tool manufacturing, plant engineering, steel construction, shipbuilding, steel mill, cutting-, laser operation, transport company or materials store

EPMB 5000

EPMB 10000

Professional advantages

- ▶ Automatic magnetizing and demagnetizing of the workpiece by AUTO mode
- ▶ 3 times safety factor and additional safety feature to drop accidentally the load in the air
- ▶ Scaled or rough surface can be mastered
- ▶ No current flow during lifting - the magnet is magnetized or demagnetized by pulse current only
- ▶ Usable in multi-shift operations, because approx. 300 switches are possible

Features

- ⊖ Selection between manual or automatic mode
- ⊖ Max. operation temperature 80°C
- ⊖ Optical and acoustic alarm device with battery charge level indicator
- ⊖ Inching for destacking is possible either by power reduction button or by optional wireless remote control
- ⊖ 300 operation cycles before recharging 8h by mains supply of 110V / 230V

Options

- ⊖ Special pole shoes for round material
- ⊖ Radio remote control for destacking sheets from 6 mm thickness or for dropping during lifting or for use with spreader beam
- ⊖ Service and repair according safety regulations

EPMM

Electropermanent Lifting Magnet

This EPMM magnets are used for frequent handling of workpieces when mains supply is available.

The switching time is rather short.

They combine the safety of permanent magnets with the convenience of electromagnets.

Only short pulse current is needed for switching, hence energy consumption is very low.

EPMM 2500

EPMM 4000

Professional advantages

- ▶ Very short switching cycles
- ▶ No drop of workpiece when power supply fails
- ▶ Mainly maintenance free
- ▶ Reduction of power for destacking from 6mm sheet thickness

Features

- ⚙️ Integrated controller for 400V / 50-60Hz / 16-63A mains supply
- ⚙️ Max. operation temperature 80°C
- ⚙️ Selection of manual mode or automatic mode
- ⚙️ Option:
 - radio remote control for destacking
 - customized applications

EPMH

Electropermanent Lifting Magnet

EPMH is for lifting and transporting heavy ferrite blocks or slaps, even with rough surface.

The casing is sturdy and equipped with alarm lamp and sound.

The square pole technology guarantees a bigger force concentration in the workpiece and bridges airgaps.

Professional advantages

- ▶ Unsensitve to rusty or rough workpiece surface
- ▶ Low energy consumption because of pulse current for switching
- ▶ No drop of workpiece, when power supply fails

Features

- ⌚ Integrated controller for power supply 400V / 50-60Hz / 32A
- ⌚ With tower lamp for indicating ON or OFF
- ⌚ With buzzer for picking up mode
- ⌚ Max. load dimension 6 m x 2 m
- ⌚ Option:
 - radio remote control
 - customized application

EPMBL

Battery Magnetic Beam

The Assfalg Battery Electro-Permanent Lifting Magnetic Beam EPMBL has a compact design. Due to the integrated rechargeable battery box, a power connection is no longer required.

The EPM Battery Magnetic Lifting Beam is operated by remote control. The load lifting beam with a max. load of 1,500 kg is equipped with magnetic modules and can thus safely move sheet metal formats from a minimum length of 500 mm to a maximum length of 4,000 mm.

Professional advantages

- ▶ There is no power connection required anymore
- ▶ Optimal adhesive force for different sheet thicknesses (from 3 mm thickness).
- ▶ With the remote control you can operate the typing function (inching: the separation of the sheets)
- ▶ Magnetic zone selection for different sheet sizes

Features

- ⌚ With 400 switching cycles, the battery shows high efficiency in its performance.

Fields of application

- ⌚ Everywhere different sheet sizes and sheet thicknesses are lifted and transported. For example: For loading and unloading of flame cutting/laser systems

Technical data

	Flatload - SWL 3:1	Min. thickness	Number of modules	Length min. - max.	Width min. - max.	Weight	Item No..
	Fh [kg]	[mm]		[mm]	[mm]	[kg]	
EPMBL	1.500	3	6	500 - 4000	1000 - 2000	700	75016

EPMBL-T

Battery Telescope Magnetic Beam

The Battery Telescopic Magnetic Beam EPMBL-T with automatic telescopic arm is a fully battery operated magnetic lifting beam. It enables the mains-independent lifting and transporting of different sheet metal formats (up to 12 t) from 4 mm thickness.

Professional advantages

- ▶ There is no power connection required anymore
- ▶ Telescopic, reach per side of up to 1000 mm .
- ▶ Optimal adhesive force for different sheet thicknesses (from 4 mm thickness).
- ▶ With the remote control you can operate the typing function (inching: the separation of the sheets)
- ▶ Magnetic zone selection for different sheet sizes
- ▶ ADPREM function prevents random switching in the air

Features

- ✔ With 400 switching cycles, the battery shows high efficiency in its performance.
- ✔ Compact design
- ✔ No damage to the sheets
- ✔ Wood for separating of the sheets are no longer necessary.
- ✔ High flexibility: allows its use on space-saving sheet stacks "fully battery operated" and telescopic.

Fields of application

- ✔ Everywhere different sheet sizes and sheet thicknesses are lifted and transported. For example: For loading and unloading of flame cutting/laser systems

Technical data

	Flatload - SWL 3:1	Min. thickness	Lenght min. - max.	Width min. - max.	Weight	Item No.
	Fh [kg]	[mm]	[mm]	[mm]	[kg]	
EPMBL-T	4.000	4	2.000 - 8.000	500 - 3.000	1.200	74765

Load Lifting Beams with patented full steel EPMagnet Modules

The EPMagnet modules are switched by mains power supply. They combine the safety of permanent magnets with the convenience of electromagnets. Sheets from 5 mm thickness can be destacked.

Magnetizing and demagnetizing of the EPM lifting system can happen manually or by radio remote control. For uneven sheet formats the EPMagnet modules are equipped with spring suspensions.

The EPMagnet modules are integrated in a magnet unit, which is fixed to the beam.

Application

- ▶ Especially for sheet lifting
- ▶ Destacking by remote control
- ▶ For loading or deloading flamecut systems on trucks
- ▶ More flexibility with telescopic beams
- ▶ For feeding and clearing of flame-cutting-/laser systems, also in multi-shift operation
- ▶ Optional: EPMagnet modules for horizontal and vertical transport

Features

- ✔ EPM lifting system is ready for use up to the crane hook
- ✔ Power supply is 400V / 50-60Hz / 16A or 32A
- ✔ Lamp and buzzer indicates the magnetization and demagnetization process
- ✔ Picking up is done with 70% power and automatically increased to 100% after 10 seconds
- ✔ Accidental demagnetization during lifting is prevented by ADPREM safety mechanism
- ✔ Different magnetic zones can be selected according to sheet size
- ✔ Low energy load consumption because of pulse current for switching
- ✔ No drop of load when power supply fails

Options

- ✔ Customized beam and EPMagnet modules
- ✔ Triggering of each EPMagnet module
- ✔ Special safety features for automation
- ✔ Integration of load cells and magnet flow sensors

Overhang table for safe load transport

Thickness of the steel plate (mm)	4	5	7	8	10	12	15	18	20
Max. overhang of the steel plate (mm)	1100	1350	1500	1550	1550	1950	2150	2550	2700

Load Lifting Beams with patented full steel EPMagnet Modules TBK4 | TBK6

The electropermanent telescopic lifting beams TBK4 and TBK6 are designed for lifting and transporting sheets of different sizes from 3m to 16m.

The patented solid steel modules allow destacking from 5mm thickness by radio remote control.

Magnetic zones and power level can be preselected according to sheet size. The EPMagnet modules are equipped with spring suspensions to balance unevenness of sheets.

Application

- ▶ For large sheets
- ▶ Destacking by inching function on remote control
- ▶ Horizontal rotation of EPMagnet units if small long sheets are lifted
- ▶ No drop of sheet when power supply fails
- ▶ Low energy consumption, because of pulse current for switching
- ▶ Customized options

Technical Data TBK4

	Load SWL 3:1	Min. thickness	Length min. - max.	Width min. - max.	Weight	No.
	Fh [kg]	[mm]	[mm]	[mm]	[kg]	
TBK4 / 75	7 500	5	3 000 - 12 000	500 - 2 500	3 000	on request
TBK4 / 100	10 000	5	3 000 - 12 000	500 - 3 000	3 000	on request
TBK4 / 120	12 000	5	3 000 - 12 000	500 - 3 000	3 000	on request
TBK4 / 140	14 000	5	3 000 - 12 000	500 - 3 000	3 000	on request
TBK4 / 180	18 000	5	3 000 - 12 000	500 - 3 000	3 000	on request

Technical Data TBK6

	Load SWL 3:1	Min. thickness	Length min. - max.	Width min. - max.	Weight	No.
	Fh [kg]	[mm]	[mm]	[mm]	[kg]	
TBK6 / 100	10 000	5	2 800 - 16 000	500 - 2 500	4 500	on request
TBK6 / 140	14 000	5	2 800 - 16 000	500 - 3 500	4 500	on request
TBK6 / 180	18 000	5	2 800 - 16 000	500 - 3 500	4 500	on request
TBK6 / 200	20 000	5	2 800 - 16 000	500 - 3 500	4 500	on request

MAP - MRP Series

Magnetic Gripper for Automation

These permanent magnets cover individual needs and can be fitted for nearly all surfaces.

They get switched within very short cycle time by pneumatic impulse.

MRP-46

MRP 28NK

MRP-46

MRP-170

Application

- ▶ For round and flat workpieces
- ▶ For workpieces with irregular surfaces
- ▶ For thin and thick sheets
- ▶ Suitable for automation, lifting operations, robotic technology, welding and clamping technology

Features

- Ⓢ Longlived construction
- Ⓢ Maintenance-free
- Ⓢ Highest safety
- Ⓢ Compressed air demand 5 - 8 bar
- Ⓢ IP Code 67
- Ⓢ Special pole shoes for special surface

MRP-46

MRP-170

MRP-170

MAP-6

Professional advantages

- ▶ Switchable permanent magnets with 3-times safety
- ▶ Custom-made pole shoes can be fitted to special forms
- ▶ Low residual magnetism
- ▶ Very short switching time by air pressure pulse
- ▶ Low energy consumption

AR Series

Magnetic Gripper for Automation

The AR permanent magnets are well controlled by air pressure. The rectangular housing is designed for an easy exchange of pole shoes. Special pole shoes are needed for irregular, uneven workpiece forms. The magnets are very flexible because one of 3 possible magnet areas can be used. This magnet is best choice when no flat area exists.

AR 50 Classic

AR 40 Naams

Application

- ▶ For round and flat workpieces
- ▶ For workpieces with irregular surfaces
- ▶ Suitable for automation, lifting operations, robotic technology, welding and clamping technology

Features

- Ⓜ Each AR device is equipped with a set of flat or tube / round pole shoes
- Ⓜ The exchangeable pole shoes can be adapted individually to the workpiece
- Ⓜ Very low residual magnetism
- Ⓜ Universal in application
- Ⓜ Very light and very heavy workpieces can be grabbed

Technical data

	Hold surface [Ø or W x H]	Load SWL 4:1	Min. thickness	Weight	No.
	[mm]	Fh [kg]	[mm]	[kg]

AR 110	150 x 114	356	38,1	28,4	62329

AY Series

Magnetic Gripper for Automation

A highly technical tool series that allows maximum saturation (performance) on thin material. Array units ("AY") offer increased power in a compact, single actuator package. These units are suited to sheet handling on the fly or in shear. This is a revolutionary automation tool that for the first time, truly challenges vacuum suction systems while delivering fast payback on the initial investment. Units can be specified for deep field (JSC) or shallow field (ASC)

M15AY

Application

- ▶ For thin workpieces:
AY-ASC with a flat magnetic field
- ▶ For thick workpieces:
AY-ISC with a deep magnetic field
- ▶ Suitable for automation, lifting operations, robotics technology, welding and clamping technology

Features

- ⊕ Very thin sheets up to 0,5 mm can be separated from the stack
- ⊕ Absolutely safe lifting – namely with 4-times safety (the pull-off strength is 4 times of the recommended lifting force)
- ⊕ Very light and very heavy workpieces can be grabbed
- ⊕ Compact and stable
- ⊕ Very low residual magnetism

Technical data	Dimensions [Ø x H] [mm]	Load	Optimal material thickness [mm]	Weight [kg]	No.
		SWL 4:1 Fh [kg]			
M10AY	66 x 105	6	1,0	0,5	72164
M15AY	79 x 112	18	2,7	0,8	67786
M20AY	98 x 127	43	4,8	1,5	71425
M30AY	135 x 153	59	3,4	2,9	67797

LAY Series

Magnetic Gripper for Automation

The "LAY" signifies Linear Array: designed for applications where stability and power are important. Ideal for long cylinders, tubing and rough surface finishes, the multiple magnetic fields in LAY units ensure strong holding forces also on thin material. Each unit comes with replaceable pole shoes for improved on-site serviceability.

LAY70x3

Application

- ▶ Perfect for round and / or flat workpieces
- ▶ Best magnetic forces for thin and thick sheet thicknesses, but also for rough surfaces
- ▶ For workpieces with irregular surfaces
- ▶ Suitable for automations, lifting operations, robotics technology, welding and clamping technology

Features

- ⚙️ Exchangeable pole shoes can be used universally
- ⚙️ Very strong adhesive forces on rough surfaces (air gap)
- ⚙️ Very low residual magnetism
- ⚙️ Quick switching by pressured air 6 - 8 bar

Technical data

	Hold surface [L x W] [mm]	Load SWL 4:1 Fh [kg]	Min. thickness [mm]	Load SWL 4:1 Fh [kg]	Weight [kg]	No.
LAY20x4	97 x 32	32	9,5	15	1,2	66532
